arma 3 community guide series. arma 3 community guide jets

Easy to 100% in less than an hour. That's the only good that can come of this.. I don't understand where people are getting this "Story Line" from? There is none, other than "the world blew up, now ferry people around aimlessly"?! Nothing else ever happened after 34minutes of play. I traveled across the US breaking windows and eating rotten food and beer? I don't get it. Refunded.. Not bad, not bad at all..

The game idea is very well made i think this game can go far.  
game is quite fun for the file size of the game and the price is really cheap.  
hopefully they keep adding new things, to the game because i think this  
game with enough effort will be a masterpiece to be proud of.

really enjoyed the time i played with my friends and keep up the good work,  
just don't get lazy and forget about this game in the development process.. Great fun game to fill in the time even if your'e  
playing solo its fun to see if you can beat your PB.. I have put a few hours into this and id say it is %100 worth the price. Don'  
buy this game unless you enjoy the following:

- Very slow build ups
- Unintelligent gameplay
- Difficulty based off of restrictive movement and buffed enemy health
- Enemies with no intelligence
- No pause menus during gameplay
- No exit button or main menu at all

\*I got to wave 99 on my first runthrough. Every enemy is predictable or on a predetermind path. Wave games are meant to implement reflexes and the players ability to process multiple scenarios while continuously thining the arena and observing a potential path. This game just forces you into corners, runs you into monotonous cycles, and did a fine job of not even living up to it's name. Good thing it was only \$2 on sale. It isn't even worth that, to be honest.. Fun game, although not a pure bullet hell

---

A long one but a good one. You play a character in an alternate earth who goes back in time and messes things up royally, getting themselves and a few friends stuck in Silverworld and they must fix things and maybe go home. It has a lot of stats to keep track of and many ways to complete your objectives. The characters are interesting and the plot is engaging. It may be a little long but that is fine.. Buggy as the worst of them. Keys dont work, xbox controller is upside down and left is right. Unplayable! Steam wont refund cause game launch window counts as play time! Laughable! I will sue for fraud. Absolute garbage, no quality control.. No tutorial. No story. Not related to anime as it was presented. Font and UI are not scalable. Poor character animation. Poor sound effects.

For the first time I experienced MMO world that does not care for its new players.. It's got a good beat and you can dance to it!.

As an achievement♥♥♥♥♥, 1 achievement is a win.

Sadly, this game is an utter piece of♥♥♥♥♥ downloading takes goddamned forever

It looks like♥♥♥♥♥ it plays like♥♥♥♥♥ it's♥♥♥♥♥ with everything.

Don't even bother for the achievement, you're wasting more time with their dumb launcher than anything other. ITS NOT FREE.. Unfair to loyal fans... but I'm happy to have it. Thank you SCS.

. it wont register in my items!
