this game surpassed all my expectations, great graphics, excellent gunplay, compelling story AND for only 15\$ (i bought it for \$5), this game is a must have for any hardcore gamer, 10/10. This game is a joy to play...if you can get it working. The securom DRM the developers use for this title makes it literally unplayable for people who purchase it and with the shutdown of Gamespy Arcade, there is no means to access the multiplayer.

Until the devs or community release a way to access the multiplayer and actually install the game, it's a waste of money..
Looking pretty good already!

Have some trouble trying to get my digital drumkit (KAT KT3) to work on it, so I hope a future update will bring midi support. I also think the graphics could be a lot sleeker, some people might find the interface too cartoony.

I did play around on it, and the sounds are pretty good! I'd even say close to professional VSTI's like Superior Drummer and EZ Drummer.. A short and difficult puzzle game with interesting mechanics. Definitely worth the 3.55698 usd. Great art style, interesting concept, but the gameplay gets repetitive and the writing could use some work.. still fun though at time.. Check out this video I made of it, gave up after part 2 due to the tedium..

<https://youtu.be/RXlvATHKAIY>. RC Cars with:

- + absurd physics
- + a lot of different power-up's
- + and even more absurd physics

Just perfect! Love it!

Owned a (non-Steam) copy many years ago - played it a lot. Now it's mostly nostalgie.. So much fun playing this game, come buy and join...

Cant wait for further update.. At this point I have only sunk about 3 hours into this game, but it is the perfect pick up and play mouse-clicker. Love it!. OK, this is of course *very* early on in the development cycle, but so far the game is shaping up to have an excellent atmosphere and presence, and is making great use of mechanics only available today on the Vive.

The spell system is unique and promising, and the story really compliments the environment nicely. I'm excited to see where this title is going, and happy to recommend it to anyone who relishes a 'real VR' experience.. If you like matching games and if you like zombies, then this game is for you. The premise is very simple but the gameplay is very fun. I love killing zombies, but sometimes I don't feel like running around to do it. This game is an interesting puzzler. I enjoy this as a casual game to rest my brain from all my all pointing and clicking :). There is a sense of urgency since the zombies can kill the survivors, turning them into zombies. With each map, the only soundtrack you get is a pulsing heart, which hightens the sense of "must kill them all before I have too few survivors!". Using certain survivors to kill zombies will cause loot to fall. You can have bio-suits, missiles, grenades, lightning bolts, and mystery items to help you fight. This game is worth the price and it is an enjoyable little game.

It's a great game with graphics that are pleasing and the gameplay is easy to understand. I'd rate 8.5/10. I had played this game quite a bit. Somewhat grindy, but I still loved it.

A pretty novel (to me, anyway) concept of a level 1 hero and relationships and such, along with all the battles and home building from rpgmaker.

Though now it seems that my save file were replaced with two I never seen before, rendering all my progress for naught.

Due to that, I can't really recommend this game until it's resolved as I'm sure that losing all your progress is something nobody likes.

Edit: It turns out the problem was addressed, though my own response to this is very late, will try out the game again!. If you love the anime, you'll love the game.

If you love the manga, you'll love the game.

If you have any affection towards anything related to my hero academia, you'll love the game.

If not, you will hate this game.

It's overpriced for its content, and they have yet to make any real changes to the game.

They released one DLC and left the game for a while. Still waiting.

I tried to keep playing, but the repetitiveness became too much, and the meta was always the same.

Hackers ruined the leaderboard.

The game needs a lot of tweaks, this review is really late.. Early days, but enjoying it thus far. Not as easy to get the gold medals as you might suspect.

Seems to be plenty of content and I like the fact that each level gives you a different limited tower set to work with. It also introduces some new and interesting mazing elements.

Price might be a bit high, but the jury's out on that one at the moment, given the apparent high content.. 3 Hours to Success !!!

It's awesome !!!.. this game is so good and it just came out but the models are a bit stuffed up but soon they will fix that and the fun land looks so cool from the video i saw in game this game is so worth the wait to download. This great game, at the moment is a work in progress and the developer is open to suggestion, and that's a big +.

As my time spent on it shows that I very much like it!

In my opinion it's a must buy, and the price is very decent.. Oyunu Ben açıkçasıya çok beğendim tıpkı cs ye benzer fakat bilgisayardan bilgisayara degisir ama cs ye gore çok az kasiyor grafikleri guzel oynarken beni içine cekiyorsanki ama guncellemeler lazım. Such a depressing game. Nowhere near the level of helldiver.
